

EFFECTIVE DATE: 09 | 01 | 2015

POLICY LAST UPDATED: 09 | 02 | 2015

OVERVIEW

This Policy provides an overview of coding and payment guidelines as they pertain to claims submitted to Blue Cross & Blue Shield of Rhode Island (BCBSRI). These guidelines follow correct coding guidelines published by National and Regional CMS (including DMEMAC), AMA guidelines, knowledge of anatomy, and the standards of medical practice.

PRIOR AUTHORIZATION

Not applicable.

POLICY STATEMENT

BCBSRI clinical editing adheres to the following guidelines:

National Correct Coding Initiative (NCCI)

Blue Cross & Blue Shield of Rhode Island follows the National Correct Coding Initiative (NCCI) for all products for physician and hospital outpatient claims.

NCCI are edits based upon code pairs. The edits are in place to prevent codes that should not be reported together from being reported. Usually one of the two members of the pair is a service already included in the other procedure and not reported separately when correctly coding. In some cases, the services are mutually exclusive, i.e., the procedures would not be performed concurrently for clinical reasons.

NCCI edits are of two types:

- 1) There are "0" indicator edits, which are never correctly reported together
- 2) There are "1" indicator edits, which may be overridden by a modifier (typically modifier 59 or a digit modifier)

The following list of modifiers will be considered exception modifiers and the CCI Edit rules will be applied based on the modifier indicator flag that is in the CMS File: E1-E4, FA, F1-F9, TA, T1-T9, LT, RT, LC, LC, RC, 25, 27, 58, 59 78, 79 or 91

Physician Fee Schedule

BCBSRI follows CMS Physician Fee Schedule (PFS) Relative Value Units (RVU) for details relating to

- 1) Global period
- 2) Assistant Surgeon
- **3)** Two Surgeons (Co-Surgery)
- 4) Bilateral Surgery, and
- 5) Multiple Procedure Reductions status

The Medicare Physician Fee Schedule Relative Value Unit files can be found on the CMS Physician Fee Schedule website (currently labeled PPRRVUxx.xlsx) at

http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Relative-Value-Files.html

1. Global Period

All procedures on the Medicare Physician Fee Schedule are assigned a Global period of 000, 010, or 090 days. If a procedure has a global period of 090 days, it is defined as a major surgical procedure. If a procedure has a global period of 000 or 010 days, it is defined as a minor surgical procedure. BCBSRI follows the surgical global period as designated by CMS on the Relative Value Units (RVU) files.

2. Assistant Surgeon (Modifiers 80, 81, AS)

When there is an assistant surgeon, the surgeon of record is listed as the primary surgeon. The surgeon of record is responsible for identifying the presence of the assistant surgeon and the work performed. In this situation, the assistant surgeon does not dictate an operative note. An MD, DO, PA, NP, CNS or RFNA serving as the assistant surgeon will report the CPT codes for those procedures.

The primary surgeon would report the procedures without a modifier and at their full fee. The assistant would append the appropriate assistant modifiers and at a reduced fee. The following modifiers should be used:

- Modifier 80: Assistant surgeon (MD or DO) who assisted on the majority of the case
- Modifier 81: Assistant surgeon (MD or DO) who assisted on less than the majority of the case available
- AS Modifier: Medicare modifier for a PA, NP, CNS or RFNA who is an assistant at surgery

Assistant Surgeon Payment Rules

We use the CMS table on the Medicare Physician Fee Schedule (PFS) as a guideline to determine if we will pay for an assistant surgeon. These are not medical necessity determinations and are not reviewed for medical necessity if appealed. The payment determination is a contractual payment policy.

The indicators on the PFSRVU file are as follows:

- Indicator 0: Assistant surgeon may be paid with documentation to support medical necessity
- Indicator 1: Assistant surgeon may not be paid
- Indicator 2: Assistant surgeon may be paid
- Indicator 9: Not applicable concept (e.g., service is not surgery)

BCBSRI will only pay for an assistant surgeon for those procedures with an indicator 2 (assistant surgeon may be paid). Participating physicians may not require members to pay an assistant fee even if the members accept responsibility to do so, as this is charging outside of the approved amount.

3. Cosurgeons (Modifier 62)

Cosurgery means that two surgeons, typically each in a different specialty, are performing distinct separate parts of the same procedure. This most frequently occurs when one surgeon performs the approach and the other surgeon performs the definitive procedure. For both surgeons to receive appropriate reimbursement, they must not be assisting each other, but performing distinct and separate parts of the same procedure.

If surgeons of different specialties are each performing a different procedure with specific CPT codes, neither co-surgery nor multiple surgery rules apply, even if performed through the same incision.

In certain instances, co-surgeons may be of the same specialty. In such cases, for services with a "1" or "2" indicator, Medicare Part B may pay for co-surgeons where the documentation justifies the medical necessity for two surgeons without regard to the two specialty requirement.

The cosurgeon modifier 62 should be appended to only one primary procedure code and its associated add-on codes. If the second surgeon continues to assist on the case, he or she becomes the assistant surgeon; modifier 81 or 82 should be used in this case.

When two surgeons are reporting services as cosurgeons, two distinct operative notes are required. The operative notes should not overlap because this negates the concept of cosurgery and will drive the use of the appropriate assistant versus cosurgeon modifiers.

Co-Surgeons Payment Rules

We use Medicare payment policy indicators on the Medicare Physician Fee Schedule Database (MPFSDB) to determine if co-surgeon services are reasonable and necessary for a specific HCPCS/CPT code.

The MPFSDB is located at:

http://www.cms.hhs.gov/apps/ama/license.asp?file=/pfslookup/02_PFSsearch.asp These are not medical necessity determinations and are not reviewed for medical necessity if appealed. The payment determination is a contractual payment policy.

Surgical procedures billed for cosurgeons will fall into one of two categories: Codes that allow a cosurgeon; Codes that do not allow a cosurgeon. When billing for cosurgeon services, please use the same codes in CMS's "always" category. BCBSRI does not reimburse for Medicare's "sometimes" or "never" categories. Participating physicians may not require members to pay a cosurgeon fee even if the members accept responsibility to do so, as this is charging outside of the approved amount.

4. Bilateral Surgery

BCBSRI has adopted CMS payment policies with respect to bilateral services. In limited cases, the implementation of the CMS bilateral payment policy and edits will result in payment reductions that are not a result of enforcing correct coding. For example, CPT® may allow use of a bilateral modifier, yet the payment policy may be to allow the same payment whether for one or both sides. In other cases, edits will enforce correct coding. For example, some CPT codes have "unilateral or bilateral" in the descriptor making it clear the service is inherently bilateral.

Bilateral Surgery Payment Rules

The Medicare Physician Fee Schedule Relative Value Unit (RVU) file (currently labeled PPRRVUxx.xlsx) has a column labeled "Bilat Surg." In the column are indicator numbers 0, 1, 2, 3, or 9. Even though the indicator is labeled "surgery," a designation is made for every service. The indicators have the following effects and rationales:

- **0**: The modifiers 50, -RT, and -LT do not apply. The code represents a single side and/or both sides. Payment for one or both sides is the lower of the total charges or 100 percent of the allowance for a single side.
- 1: This designation indicates that the second side is treated as a multiple procedure and is accordingly reduced whether a modifier or two units of service are reported. BCBSRI does not typically unit price surgical services subject to multiple procedure reduction. Therefore, use modifiers. Payment is at 150 percent for -50 or combined -RT and -LT.
- 2: The service is bilateral by description. (In most cases application of modifiers or units is incorrect coding as the descriptor is explicitly bilateral.) Use of 50, -RT, -LT, or 2 units is not applicable. Payment is the lower of the charge or 100 percent of the service allowance.
- 3: This indicator does not occur on any surgeries. It is seen mostly in imaging of limbs and some eye codes. For procedures with status 3, we ask that you report each side as a single line using -RT/-LT. Payment is based on 100 percent for each side or the total charge if lower.

9: The concept of "bilateral" does not apply as this is used for items such as drug codes where bilateral is nonsensical.

Coding for Bilateral Services

BCBSRI claims filed with bilateral services using the -50 modifier should be filed on one line. Bilateral claims filed using the RT and LT should be filed on two separate lines.

5. Multiple Procedure Reduction Payment Rules:

BCBSRI follows the CMS Relative Value Units file for multiple surgical reductions (MSR) rules and the AMA CPT book for modifier 51 exempt codes and for add-on codes. CMS will reimburse the highest surgical procedure at 100%, and each additional separate procedure that is not considered bundled or denied at 50% of the allowable amount. Multiple procedure reductions apply to services rendered by the same physician on the same date of service.

CMS Multiple Procedure Indicators (MULT PROC) are found in the most current CMS National Physician Fee Schedule Relative Value File. The values assigned to CPT codes for reimbursement are:

- No payment adjustment rules for multiple procedures apply.
- Standard payment adjustment rules for multiple procedure apply.
- 3 Special rules for multiple endoscopic procedures apply if procedure is billed with another endoscopy in the same family.
- 4 Special rules for the technical component (TC) of diagnostic imaging procedures apply if procedure is billed with another diagnostic imagining procedure in the same family.
- Concept of multiple surgical reductions does not apply.

AMA CPT Modifier 51 exempt and add-on codes

Codes that are modifier 51 exempt are separately reimbursed without reducing payment if services are appropriately reported together.

Add-on codes are separately reimbursed without reducing payment when appropriately billed with proper primary procedure codes.

6. Split Care Modifier (54, 55, 56)

BCBSRI follows CMS guidelines regarding which procedure codes are valid for use with split care modifiers 54, 55, 64. Reimbursements of modified codes are based on the CMS percentage on the RVU file.

7. Technical Component - TC

Technical Component refers to certain procedures that are a combination of a physician component and a technical component. Using modifier TC identifies the technical component. BCBSRI follows CMS guidelines for correct usage of the TC component. The TC modifier should only be appended to health service codes that that have a 1 in the PC/TC field on the National Relative Value Field file.

BCBSRI recognized modifiers:

Billing Information

Refer to the most updated industry standard coding guidelines for a complete list of modifiers and their usage. In the instances when a modifier is submitted incorrectly with the procedure code, BCBSRI will deny the claim line for incorrect use of modifier.

Note: The absence or presence of a modifier may result in a claim being denied.

Billing Information

Refer to the most updated industry standard coding guidelines for a complete list of modifiers and their usage. In the instances when a modifier is submitted incorrectly with the procedure code, BCBSRI will deny the claim line for incorrect use of modifier.

Multiple Modifiers

BCBSRI accepts the submission of multiple modifiers.

Modifier 24

In order to clarify the correct use of Modifier 24 when visits in the post-operative period combine postoperative care with E/M unrelated to the procedure, the following shall apply:

The primary reason for the service shall be the unrelated condition. Incidental minor findings or lower levels of medical decision making do not warrant separate E/M reporting. The number and level of E/M in the post-operative period reflects a range of anticipated complexity and number of visits.

When eligible to be reported, the basis of code selection shall not include the key components related to the procedure post-operative E/M.

In the case of planned separate surgeries (e.g., sequential cataract surgery) that are not staged procedures, E/M within the global period related to the second planned surgery is not separately reportable unless there is a significant change in the patient's condition. Confirming plans and verification of information that would be expected to be up to date as part the routine post-operative care, will not be considered a distinct service.

The list below represents the most common modifiers used by BCBSRI and identifies how they are used for claims processing. This is not an all-inclusive list of modifiers.

Modifier	Modifier Description	System Indications	Reimbursement
			Impact
22	Unusual procedural services	Claims review for	Claim review required.
		additional payment/not	Exception for BCBSRI:

Medically Unlikely Edits (MUEs) or Maximum Unit Limits

The Maximum Units of Service value used in our clinical editing is derived from several sources: National and Regional CMS (including DMEMAC), AMA guidelines, knowledge of anatomy, the standards of medical practice, FDA and other nationally recognized drug references, and claims data from provider billing patterns.

Diagnosis Codes

Code to the Highest Degree of Specificity

Providers who must select ICD-9-CM (ICD-10) diagnosis codes should use codes that provide the highest degree of accuracy and completeness, or the greatest specificity. For example, an ICD-9-CM carried to the 5th digit when applicable. The Centers for Medicare and Medicaid Services (CMS) require all Medicare practitioners to use ICD-9-CM (ICD-10) diagnosis codes with the highest specificity as requested by the Health Insurance Portability and Accountability Act (HIPAA).

MEDICAL CRITERIA

Not applicable

BACKGROUND

In the development of claim editing rules, BCBSRI, follows correct coding guidelines published by National and Regional CMS (including DMEMAC), AMA guidelines, knowledge of anatomy, the standards of medical practice.

COVERAGE

This medical policy is made available to you for informational purposes only. It is not a guarantee of payment or a substitute for your medical judgment in the treatment of your patients. Benefits and eligibility are determined by the member's subscriber agreement or member certificate and/or the employer agreement, and those documents will supersede the provisions of this medical policy. For information on member-specific benefits, call the provider call center. If you provide services to a member which are determined to not be medically necessary (or in some cases medically necessary services which are non-covered benefits), you may not charge the member for the services unless you have informed the member and they have agreed in writing in advance to continue with the treatment at their own expense. Please refer to your participation agreement(s) for the applicable provisions. This policy is current at the time of publication; however, medical practices, te chnology, and knowledge are constantly changing. BCBSRI reserves the right to review and revise this policy for any reason and at any time, with or without notice.
